The Water Problem.

We judge from the following article from the Landmark that Norfolk has a

water problem:

"Richmond has a water question on hand. The Dispatch says the people use or waste too much under the present system, and advocates limiting each citizen to forty gallons per day. It thinks—and the opinion is backed by eminent water authorities—that this would be ample. The pian snggested is to make the present water-tax cover a supply to each person, little and big, of forty gallons, and all over that, used or wasted, make subject to an extra cost.

LANGSTON'S PRIENDS DETERMINED. From all that can be learned in con versation with the friends of John M. Langston it may be said that the collaim that nothing but unfair means can defeat him of the nomination, and that his defeat in the Farmville Convention by such means insures his nomination by the people. In the contest that would then ensue the Farmville nominee would not be recognized by the colored masses. A leader of the Langston forces said this morning that Petersburg will undoubtedly send a solid delegation to Farmville in his favor. All the colored men of political prominence here are working for him. Langston's friends have the auhim. Langston's friends have the authority of General Mahone himself in a decision rendered in the memorable mayoralty contest between Mr. T. J. Jarratt and Mr. James D. Bowie, declaring that the people have the right to choose whom they please as delegates without regard to color, and they propose to take advantage of this decision, and as they have the majority of the Reand as they have the majority of the Re-publican voters in each ward the result may well be anticipated. They are also making note of the organization of white
